Product Description

SAE1020 SAE1045 DIN 17175 Circular Hot Rolled Steel Tube For Chemical 21.3mm - 609.6mm

Product Description:

Advantages :

Due to our adoption of hot rolling process, the original casting structure of the steel slab for making hot rolled pipe is destroyed. This means that the crystalline grains of steel material are refined, and the defects of the microstructure of steel slab are eliminated, which results in improved mechanical performance and denser microstructure of steel materials along the rolling direction.

Hence, our hot rolled seamless steel pipe features good mechanical property and superior intensity.
